

Hello Dear Pearl,

I respectfully request some of your valuable time in reading this letter. Thank you.

I'm beginning this with somewhat of a personal confession; so that you might gain somewhat of an insight into the human being I am, thusly perceiving the sincerity of myself and henceforth the genuineness of 'my' proposal.

For most of my adult life I have been ashamed of being a white man; especially upon reading the book “Bury My Heart At Wounded Knee” (around 1968), during the reading of which I cried; so much so I couldn't finish reading it!

Recently I read a typed copy of a book “Liberating Life: Women's Revolution” by Abdullah Ocalan. International Initiative Edition; First Edition: 2013. Of which I began reading some sixty odd days ago, during which I have felt so existentially ashamed to be a human being male that I even attempted unconscious suicide....how I circumvented that is a whole 'nother true story – which reveals, among other valuable lessons, one should never imbibe alcohol; for ANY reason!

I felt so ashamed because with the deeper understanding of the depth and breadth of the demeanment, subjugation, exploitation, enslavement and (therefrom the) intrinsic devaluation of the female of our species by the other half, us men; via the development and ongoing evolution of the “Patriarchial Mind-set” that has culminated in the global population creating the world-wide capitalist system presently operating. I real-eyes-ed the (previously unconscious) role I had been playing; which shook me to the core of my being!

Thankfully, though, I had recently embarked upon, in partnership with a most wonderful lady, (whom, by the way, was/is the major initiator) a (conscious) journey of endeavouring to change both my own personal role and to convince others that there is the potential of our changing our own consciousness and creating a vibrant and workable alternative replacement civilization for the harmonious enhancement of each human individual along with that of every other life-form we presently share this realm with.

Though extensively (physically) searching throughout two regional libraries and various other libraries here within Australia, in the decades of the eighties and nineties, then as well on the Internet, and unsuccessfully wracking my mind attempting to formulate a workable hypothesis of what is required for us to intelligently and humanely build a new civilization for all; right up until October 2020. Then I met, online, a woman whom, whilst introducing herself to me, requested that I have a read of two articles that she had relatively recently authored....and here was what I had been searching for for the previous forty years - I was resoundly astounded, here it all was, in just two articles, “Treatises” actually, by far nowhere near book length yet described what was needed in creating the intelligent and humane civilization that would ordinarily otherwise necessitate two to several books to “outline”! And Authored by the one person, a woman – revealing that women, though having been subjugated and suppressed, demeaned and physically, emotionally and psychologically enslaved for five thousand years (at least), still have intelligence surpassing the male!

I would like to introduce Denise Ward to you via her own heartfelt “Proposal”:-

May 9, 2021

Proposal to Indigenous People

Hello my friends,

Let me say this to begin - I wish you to know we have great honor for you and all that you have been through. We cannot fathom the trauma that white man's laws have wrought on your people. Our heartfelt sorrow for all that has occurred, we feel for your plight.

We honor especially your care for nature and the care of children and elders. We have much to learn from you and we are very willing to learn. We want to restore nature, we want to restore the love between people. Your tribes people lived in harmony with nature and with each other for centuries. Maybe your people had tribes who were barbaric too but even so there is no parallel to the barbarism of the white man.

We want to make things right again. After a lot of thinking, we have put together a proposal we wish to make to you. It is a very involved proposal because it lays out the foundation of a new society. A society where everyone is equal, not just with adults but with children and animals too. And insects and trees. A culture that sees itself as part of the web of life, where every species is valuable and has "the right" to live their lives in harmony.

This may seem like pie in the sky but it isn't. We have everything we need to place the foundations right now. Everything we need is available to us. We feel we have a short window for action as the walls of white man's law bears heavily upon us all now.

The culture we wish to bring forth must start with our own action as an individual. The change starts from within. The change requires us to see ourselves as equal to everyone. We conduct our lives as sovereign individuals all who are human. We have no model for this and perhaps this is also where we can learn from you since your tribes taught the white invaders about democracy. Today we have modern technology, we have arrived here from the efforts of people before us who had faith in the future but who are not here now. We build this new culture for them too, to manifest the fruit of their labors and their dreams. We do this for our children but also for ourselves and for nature. For we no longer wish to live in a world that believes in authority over anyone. The idea of authority will become abhorrent, because everyone is equally valuable but not equally the same. We are each a unique individual, each with a unique history and makeup and each their own harmonic signature. The new culture will welcome differences.

We are not just talking frivolously when we come to you, we have substance to back everything up. If we believe in equality then our currency must reflect that and so too our social systems. We can deal with the details of it later, it is not a big deal to design a currency that works for the people. The substance to regaining our power is to uphold free speech. This may seem too simple but it is the crux of equality. Though there are problems in some situations with speech that hurts or offends, that is minor compared to the damage that censorship causes. Free speech is the only "weapon" in a defenseless people. We don't have the weapons nor do we want them for we are not barbaric. We are rising above our barbarism. However this puts us at a

disadvantage before the predatory forces.

Free speech is so powerful that it can even keep the predatory forces at bay. It is our only safeguard in a world that will probably always have evil. Censorship allows evil to thrive. Therefore all our transactions in this new culture, must be transparent and all information must be free and open. The idea of copyright and patents will just be like a bad dream - they will be replaced with a totally different perspective - information is the real wealth therefore our new culture will share information freely and willingly. This will engage the humane part of our nature. Speech that is not welcome can be responded to by more speech, preferably rational speech. However censoring speech is the wrong way to go and will only give power to those who already have immense power.

There are many changes to social ideas in this new culture we want to familiarize you to, and you may read about them posted at the Womens' Council. The main thrust of this proposal however is in understanding that we must have land as we are from the earth. For we are in an impossible position without land. We must reclaim land to the commons, simply because we have to have somewhere on earth that we can live in harmony without predators breathing down on us. This we envisage getting in two ways.

The way that involves your people is by utilizing your reservations and start new villages on them. As well, these villages will be based on a hemp economy. We will use hemp for our products. We shall not allow harmful pesticides or pollutants. We will use a properly-set up consensus system rather than a political system for decision making. Every individual can make a proposal, including children. And everyone will be able to vote on proposals that others make. We will use technology as the platform to calculate results and datasets and provide the infrastructure. This is not difficult to do.

A declaration of severance from government must be made at some time in the process. The declaration must express our complete repugnance of white man's law and its total illegitimacy. But we will give them time to catch up by laying out a five-year plan. Every year taxes will be reduced by 20% so that after 5 years, our payments of taxes will be nil. During the 5 year period, we will not require any of their services. The only service we will use are roads as we have paid for them for the next thousand years. If we should need any of their other services such as ambulance, police, schools, etc, we will make a request and negotiate a suitable price at the time that we require the service.

The homes in these villages will be made from renewable materials mostly hempcrete. Hempcrete reduces energy needs by 70%. We will utilize other plants such as bamboo and retain as many trees as possible on the lands by using hemp for paper. The villages will use human waste to fertilize the lands - composting toilets in homes and water retention systems. We will build hemp processing plants to make the raw materials for producing hemp products.

Schools will be built and they will be open 24 hours. There will be a variety of learning methods however if there is at least one teacher and one student, that subject will be able to be taught in the schools. Indigenous languages and history will be supported. Online learning will also be utilized.

We will grow our own food and teach the children how it's done. We will use organic practices and permaculture techniques.

We will not need government as we will become the government. Instead of government members making proposals and voting on them, *we* will make the proposals and *we* will vote on them. The infrastructure will be custom designed for this to all work smoothly. Not just government but courts too will all be open source and based on free speech. Again, details of this can be found at the womens' council page if you want to dig into the details.

Human history has been very dire and right now we stand at the precipice of ever more direness. Our children have no future. Our environment is poisoned at every turn. Depression, suicide, and desperation continue without end in sight and with only more disaster in sight. One day we will have to take a stand and the delay of making this stand only makes us slide ever lower. We must stand in strength and stand together. Indigenous people have been brutally destroyed. But so have the white and black people. Our history is littered with barbarism. Our earth is being raped as are our children. We are being ruled by utter madmen. It seems normal now because we haven't had anything else. But we must create something else. It is up to us all. Can we start again in goodwill? Together?

There is nothing to lose by trying this out - yet there is so much to gain. At least in parts of the world people can finally be free and hopefully it will catch on. We won't stop the madness but we shall reclaim our will and take back lands that belong to the indigenous. The culture will grow when we have laid out the first model. We will continue to seek more parcels of land by asking for donations from individuals who want to leave lands in their will, to this new culture. Also those who want to donate land because they wish to contribute to see this unprecedented venture take shape. We shall name the villages on these lands after the donor of the parcel, in honor of supporting a new beginning.

We will create a culture where children are safe and people are occupied and motivated, designing new clean and renewable energies, transportation, localized energy and local manufacturing, organic housing, teaching and learning, growing food locally, building the soil, tending animals, engineering, singing and making art or whatever is our passion. This is how we were meant to live on this beautiful earth that gives us all we could ever want. We only have to stay in harmony with her. That is not too much to ask.

We have all got it in us. To be equal is the most noble of all. The idea of supremacy must be made redundant. We have people energy and people intelligence and let us put that together with our natural ability so that we may build this world together. Oh by the way, we will also claim our own calendar. We shall dispense with the Roman calendar and use a calendar that reflects our cyclical human nature. There will be no stopping our progress. It will come out in every person. When the basics for living are in tune with nature and with our soul, we are unimaginably strong. The time is now. You are here for a purpose.

With deep esteem for your people and a hope that we may all come together in goodwill, we seek your interest and serious consideration to have further discussions with you about the proposal here given and we welcome any questions you may have. We look forward to building this world with you, you who have given so much and been so unspeakably abused. There has never been a better time as none of us has anything to look forward to. Our children will thank us.

Though the two mentioned previously “Treatises” require sometime to read and 'digest', they, I sincerely think, you will find most interesting? Links to them follow:-

Both the Author, Denise Ward and myself, Frederick Reed, would be very interested in continuing communication with you about these matters. Our E-mail Addresses are:-
deniseward@gmail.com and mine (Frederick Reed): nospacetime@exemail.com.au

We, either one of us, look forward to reading from you.

Have A Great Day!

In Appreciation, Frederick and Denise.
